### Introduction

We have reviewed the accompanying condensed interim consolidated financial statements of **RA Holding Corp.** (the "**Company**") and its subsidiaries (together the "**Group**"), which comprise the condensed interim consolidated statement of financial position as at 31 March 2018, and the condensed interim consolidated statement of profit or loss, condensed interim consolidated statement of comprehensive income, condensed interim consolidated statement of cash flows and condensed interim consolidated statement of changes in equity for the period from 1 July 2017 to 31 March 2018, and a summary of significant accounting policies and other explanatory information. The Board of Directors is responsible for the preparation and presentation of this interim financial information in accordance with IAS 34 Interim Financial Reporting. Our responsibility is to express a conclusion on this interim financial information based on our review.

### *Scope of review*

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### *Conclusion*

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed interim consolidated financial information does not present fairly, in all material respects, the condensed interim consolidated financial position of the Group as at 31 March 2018, and its condensed interim consolidated financial performance and its condensed interim consolidated cash flows for the nine month period then ended in accordance with IAS 34 Interim Financial Reporting.

## Notes to the condensed interim consolidated financial statements

### For the period from 1 July 2017 to 31 March 2018

#### 1 Introduction

##### a) Corporate information

RA Holding Corp. (the "Company" or the "Successor Company" or "RA Holding" and together with its subsidiaries "RA Group" or the "Group") is an exempt limited liability company incorporated in the Cayman Islands on 28 June 2013 with its registered office situated at the offices of Paget-Brown Trust Company Ltd., Boundary Hall, Cricket Square, P.O. Box 1111, Grand Cayman KY1-1102, Cayman Islands.

##### b) Activities

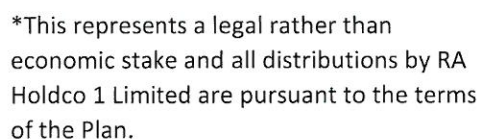

The Company has been formed to indirectly hold a portfolio of private equity investments that were originally partially owned and managed by Arcapita Bank B.S.C. (c) ("Arcapita" or the "Predecessor Company" or the "Bank"), a wholesale bank incorporated in the Kingdom of Bahrain. The objective of the Company is to hold and manage the transferred investments and sell these down in the normal course of business in a manner which is expected to maximize the return to all stakeholders.

The structure of RA Group is set forth in note 1(d) to the condensed interim consolidated financial statements.

##### c) Approval of the condensed interim consolidated financial statements

These condensed interim consolidated financial statements have been approved and authorised for issuance by the Board of Directors on 31 May 2018.

d) Group structure

# Notes to the condensed interim consolidated financial statements

## For the period from 1 July 2017 to 31 March 2018

### 2 Significant accounting policies

#### 2.1 Basis of preparation

The condensed interim consolidated financial statements of the Group have been prepared in accordance with IAS 34 Interim Financial Reporting. They do not include all of the information required in annual consolidated financial statements in accordance with International Financial Reporting Standards, and should be read in conjunction with the consolidated financial statements of the Group for the year ended 30 June 2017. In addition, results for the nine months period ended 31 March 2018 are not necessarily indicative of the results that may be expected for the financial year ending 30 June 2018.

The Group consists of the Company and its subsidiaries and affiliates as detailed in note 2.2.

These condensed interim consolidated financial statements represent the only financial statements issued for the Group.

The assets of the Predecessor Company were transferred to the Group primarily at their fair values as determined by third party independent valuers as on 17 September 2013, the date of emergence, whereas, liabilities were recognised at their estimated settlement amounts.

The condensed interim consolidated financial statements are presented in United States Dollar (US\$), which is the Group's functional currency, and all values are rounded to the nearest thousand (US\$ '000) except when otherwise indicated.

#### 2.2 Basis of consolidation

These condensed interim consolidated financial statements comprise the condensed interim consolidated financial statements of the Company and its subsidiaries for the period ended 31 March 2018. The consolidated subsidiaries of Arcapita were transferred to RA Group on the emergence date in accordance with the Plan of Reorganization and have been consolidated from 17 September 2013 to the date of condensed interim consolidated statement of financial position.

The financial statements of subsidiaries are prepared using consistent accounting policies. The Group has utilised the "investment entity" exemption for investment in subsidiaries held for sale in the normal course of business. These investments are carried at fair value through profit or loss.

Control is achieved when the Group is exposed to, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- a) Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- b) Exposure, or rights, to variable returns from its involvement with the investee; and,
- c) The ability to use its power over the investee to affect its returns.

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- a) The contractual arrangement with the other vote holders of the investee;
- b) Rights arising from other contractual arrangements; and,
- c) The Group's voting rights and potential voting rights.

The Group will re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the period are included in the condensed interim consolidated statement of profit or loss from the date the Group gains control until the date the Group ceases to control the subsidiary.

# Notes to the condensed interim consolidated financial statements

## For the period from 1 July 2017 to 31 March 2018

### 2 Significant accounting policies (continued)

#### 2.2 Basis of consolidation (continued)

All intra-group assets and liabilities between members of the Group are eliminated in full upon consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- Derecognises the assets (including goodwill) and liabilities of the subsidiary;
- Derecognises the carrying amount of any non-controlling interests;
- Derecognises the cumulative translation differences recorded in equity;
- Recognises the fair value of the consideration received;
- Recognises the fair value of any investment retained;
- Recognises any surplus or deficit in profit or loss; and,
- Reclassifies the parent's share of components previously recognised in other comprehensive income to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

The following are the principal operating subsidiaries of the Company which have been consolidated in these condensed interim consolidated financial statements:

## Notes to the condensed interim consolidated financial statements

### For the period from 1 July 2017 to 31 March 2018

Pursuant to the MSA signed between the Group and AIM, AIM is entitled to a base management fee, enhanced management fee, incentive fee and a deferred incentive fee. The Board of Directors are entitled to incentive fees beyond a certain distribution threshold. In addition, based on the RA Holdco 1 incentive compensation plan for non-employee directors signed and executed on 16 July 2015, the Board of Directors of the Company are entitled to receive incentive based on certain percentages of distributions to holders of the Sukuk Obligations and the New Arcapita Shares less amounts paid to allocated or credited to non-employee members of the Board under the RA plan.

## 7 Senior class A preference shares

	<b>73,776</b>	<b>87,306</b>

As of the date of condensed interim consolidated statement of financial position, the Group has carried out a reassessment of the cash out flow available to settle the senior preference shares and has shown the senior preference shares on that basis. The movement of change in carrying value of obligation to preference shareholders during the period is as follows:

	31 March 2018 US\$ '000	30 June 2017 US\$ '000
<b>Carrying value of obligation to preference shareholders</b>		
Beginning balance	87,306	110,110

Foreign currency translation gain / (loss) of foreign operations	18	(2,566)
Ending balance	<b>73,776</b>	<b>87,306</b>

During the period, US\$ 10 million was distributed to senior class A preference shareholders. The distribution payable to preference shareholders as at 31 March 2018 from previous distributions amounted to US\$1.5 million (30 June 2017: US\$ 1.7 million).

## Notes to the condensed interim consolidated financial statements

For the period from 1 July 2017 to 31 March 2018

### 8 Other liabilities (continued)

- 8.1 Pursuant to the Plan of Reorganization, certain prepetition creditors were given an option of receiving "convenience class" treatment on account of their claims pursuant to which their claim would be settled in cash at 50% of their actual liability with a cap of US\$ 12,500. These claims have been transferred to the Group pursuant to the Plan of Reorganization and are reflected at their expected settlement amounts.

The total amount of convenience claims as at 31 March 2018, represents claims which have been submitted up to the date of issuance of these condensed interim consolidated financial statements and have been or are expected to be allowed. Aggregate cash payments to convenience claim holders is capped at US\$ 9.7 million. As of the date of condensed interim consolidated statement of financial position, the total convenience claims recognised by the Group amounted to US\$ 3.9 million (30 June 2017: US\$ 3.9 million) of which US\$ 3.7 million (30 June 2017: US\$ 3.7 million) has been settled.

- 8.2 This balance represents cash proceeds received in relation to the sale of certain assets and which are maintained to secure the Group's indemnity obligations (e.g., taxes, professional fees, and wind down expense), if any, pursuant to the terms of divestiture of certain assets during the period ended 30 June 2014. As discussed in note 3.2 of the condensed interim consolidated financial statements, these cash balances are reserved specifically against this liability and hence have been excluded from cash and cash equivalents.

### 9 Contingencies

At 31 March 2018, there were pending legal cases against the Group in Bahraini Courts. These include cases brought forward by a number of investors and investment account holders of the Bank which were forfeited under the Plan of Reorganization due to the failure to submit verification materials.

No amount has been recognized as a provision since the Board of Directors considers the claims to be unjustified and the probability that they will require settlement at the Group's expense to be improbable. Further information on these contingencies is omitted so as not to seriously prejudice the Group's position in the related disputes. Further, the Group is contingently liable to pay potential taxes related to the sale of certain investment.

### 11 Fair value of financial instruments

Fair value is the price that would be received upon the sale of an asset or that would be paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The Group's financial instruments have been classified in accordance with their measurement basis as follows:

## Fair value hierarchy

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximizing the use of relevant observable inputs.

All assets and liabilities for which fair value is measured or disclosed in the condensed interim consolidated financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;

Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices). This category includes financial instruments valued using quoted market prices in active markets for similar instruments; quoted market prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data; and

Level 3: inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs). This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have significant effect on the financial instrument's valuation.

The table below analyses financial instruments measured at fair value at the reporting date, by the level in the fair value hierarchy into which the fair value measurement is categorised. The amounts are based on the values recognised in the condensed interim consolidated statement of financial position.

#### Valuation processes of the Group

The Group has engaged third party qualified valuation experts to perform the valuation of certain Group investments as of 31 March 2018. The third party valuers have utilised methods and techniques generally recognised as standard within the industry. These include discounted cash flows, earnings multiples and comparable market transactions approaches for private equity investments. Real estate investments were measured using the sales approach, discounted cash flows or the capitalization of future cash streams of the underlying asset using prevailing capitalization rate for similar properties or similar geographies. The valuation experts applied their judgment in determining the appropriate valuation techniques and considerations of unobservable valuation inputs used in valuation models which include discount rates, exit multiples, specific risk premiums, control premiums and comparable assets or companies.

The external valuers provided the Board of Directors with a range of values which were determined on the basis of different valuation approaches. The Board of Directors applied their judgment in determining appropriate values for individual investments from within the range which in their view is more representative of the fair value under the market conditions as at the date of the condensed interim consolidated statement of financial position.

The techniques used by the independent valuation experts to determine fair values are described in detail below:

#### Valuation techniques used to derive level 3 fair values

##### Market approach

The market approach provides fair value indications for a company through a comparison with guideline public companies or guideline transactions. The market approach entails selecting relevant financial metrics of the subject company, such as revenues, earnings or cash flows, and capitalizing those amounts using valuation multiples that are based on empirical market observations.

Firms engaged in the same or similar businesses, whose securities are actively traded, are selected for comparative purposes, and their capitalization rates are used as a guide in selecting appropriate risk-adjusted rates for the subject company. Enterprise value to earnings before interest, taxes, depreciation and amortization ("EV/EBITDA") ratios, established in active arm's length trading, are expressions of what prudent investors believe are fair and reasonable rates of return for these securities. Thus, they are interpreted as being reliable indicators of fair capitalization rates for the subject business, appropriately adjusted for risk factors.

---

**Notes to the condensed interim consolidated financial statements****For the period from 1 July 2017 to 31 March 2018****11 Fair value of financial instruments (continued)****Income approach**

The income approach provides fair value indications for a company, asset, debt or other investment through an analysis of its projected economic earnings (i.e., net operating income or cash flows), discounted to present value. The Discounted Cash Flow (DCF) analysis, a commonly used method under the income approach, estimates the present value of the projected cash flows to be generated by the subject company, asset, debt or other investment. The discount rate used in the DCF analysis is intended to reflect all relevant risks associated with realizing the stream of projected cash flows.

**Asset-based (cost) approach**

Under this method, a valuation analysis is performed for a company's identified fixed, financial, intangible and other assets. The derived aggregate fair values are then offset by the estimated fair values of all existing and potential liabilities, resulting in an indicated range of values attributable to Shareholders' equity. This method was utilised in valuing investment companies where operating earnings are insignificant relative to the value of the underlying assets.

**Sales comparison approach**

In the sales comparison approach, the appraiser develops an opinion of value by comparing the property being valued to similar properties that have been sold within a reasonable period from the valuation date, applying appropriate units of comparison, and making adjustments to the sale prices of the comparable based on the elements of comparison.

The following approaches have been utilised by the valuation experts to value real estate investments:

**Direct capitalization approach**

The direct capitalization approach measures the property's capacity to generate future benefits and capitalises the income into an indication of value. Using the direct capitalization approach, a net operating income (or net cash flow) from real estate operations is capitalised by an appropriate rate of return (of one year's net operating income). The resulting present value of the future cash flow stream represents an indication of fair value.

**Discounted cash flow approach**

The discounted cash flow approach measures the property's capacity to generate future benefits for a specified holding period and capitalises the income into an indication of value. Using the discounted cash flow approach, a net operating income (or net cash flow) from real estate operations or the sale of assets is discounted by an appropriate rate of return over the forecast of net cash flows projected over an appropriate investment horizon. The resulting present value of the future cash flow stream represents an indication of value. The technique used is dependent on the characteristics of the asset and the method used to value them.

#### The effect of unobservable inputs on fair value measurement

Although the Group believes that its estimates of fair value are appropriate, the use of different methodologies or assumptions could lead to different measurements of fair values. For fair value measurements in level 3, changing one or more of the assumptions used to reasonably possible alternative assumptions would have the following effects:

#### 31 March 2018

		Change	Impact on income	
			Favour- able US\$ '000	Unfavour- able US\$ '000
Private Equity investments	Asset multiples	+/- 10%	382	(388)

	Discount rates	+/- 1%	2,165	(1,828)

#### 30 June 2017

		Change	Impact on income	
			Favour- able US\$ '000	Unfavour- able US\$ '000

Balances with banks represent cash and cash equivalents and are due on demand. The carrying value of these balances represents their fair value.

The recoverability of due from investee companies, i.e. investment related receivables (management fee receivables, murabaha with investee companies and receivables from investee companies) were determined through waterfall calculations, which used the enterprise values as determined by the independent valuation experts. The carrying amounts therefore approximate the fair value of these receivables.

The fair value of obligation under senior class A preference shares cannot be ascertained accurately as there are no comparable market transactions of similar instruments. Further, this obligation does not have a fixed repayment schedule and their repayment is subject to the repayment of priority claims. Accordingly, this obligation has not been disclosed in the above table.

#### 12 Related party balances and transactions

Related parties consist of associated companies, significant shareholders, directors and entities controlled, jointly controlled or significantly influenced by such parties. Pricing policies and terms of the transactions carried out with the investee companies were approved by the previous board of directors of Arcapita and those approved agreements were transferred to the Group in accordance with the Plan of Reorganization. Any related party transactions subsequent to the date of emergence have been approved by the Group's Board of Directors.
